Price—More equable price than if there were two bodies (J. A. Glynn), X., 55941-2.

Transfer of all purchase powers to new Department started in 1903 was contemplated, but not for long (G. Wyndham), V., 22891.

Powers of authority should be absolute (Rev. P. Glynn), VII., 40180.

AUTHORITY TO DEAL WITH CONGESTION—*continued.*

- Public Opinion, Weight of public opinion needed to enable authority to act at all—Possibility of creating desired Opinion (H. Plunkett), IV., 21584-91.
  - Commission should state frankly and fearlessly what they believed to be the ideal settlement; to redistribute land in accordance with existing public opinion would result in a demoralising scramble for land among the Agricultural population (H. Plunkett), IV., 21553-7, 21564, 21592-3.
- Relations between authorities—Closest concert and consultation between body charged with redistributing land and that attending to agricultural development required (H. Plunkett), IV., 21491, 21550.
- Scotland—
  - Congested Districts Board not intended to be permanent (R. R. Macgregor), IV., 21872.
  - New Land Commission, creation proposed by Bill of 1906—Functions, &c. (R. R. Macgregor), IV., 21862-3, 21867-71.
- Special authority and machinery needed (A. J. Balfour), V., 22103-4, 22131; (Rev. D. O'Hara), I., 4066-7; (Mgr. M'Glynn), II., 10331.
  - Congested Districts Board the only Board that had successfully attempted to give what was asked and what was needed (Canon Sweeney), II., 9813-4.
  - Existing conditions exactly the same as when the Board was established (Rev. D. O'Hara), I., 4065.
  - General control of all congested districts should be vested in special authority (A. J. Balfour), V., 22105.
  - Section of Estates Commissioners appointed for special purpose of dealing with congestion under a special Estates Commissioner, Question of—Practically the Board as it is under another name (Rev. D. O'Hara), I., 3995-7.
  - Special efforts and legislation needed in regard to real plague spots; introduction of spoon-feeding into other parts not at all desirable (F. S. Wrench), III., 15186-7.
  - West of Ireland required special treatment; one distinct body required—Body operating all over Ireland might not be able to devote sufficient attention to the special needs (Rev. D. O'Hara), I., 3936-8, 3993, 3998-4004, 4035, 4044, 4050, 4059-60.
  - *Refer* also to sub-heading Department of Agriculture, Transfer to, etc.—Poorer Districts.
- Sympathetic treatment required—
  - Closer touch with local conditions needed; Congested Districts Board and Estates Commissioners both sat in Dublin (D. T. Crosbie), V., 26726, 26880, 26942.
    - Board themselves should come into practical connection with people in the country doing inspection, &c.—Witness could not deal with Mr. Doran to sell his property (D. T. Crosbie), V., 26908-10.
  - Instances of success of sympathetic treatment in dealing with United Irish League and Land League—Case of estate in Athenry, &c. (D. T. Crosbie), V., 26960-9.
  - Meaning of sympathetic treatment—Officialism hated in Connaught (D. T. Crosbie), V., 26943, 26045.
    - Reason why Congested Districts Board had the confidence of the people and Estates Commissioners had not; reason also of sympathy between landlords and tenants (D. T. Crosbie), V., 26945-7.
  - State should provide money and leave the spending to unofficial persons in sympathy with the people (D. T. Crosbie), V., 26956-7.

AUTHORITY TO DEAL WITH CONGESTION—*continued.*

- Two or more Agencies in same area doing same class of work—
  - Clashing, Danger of (J. A. Glynn), X., 55955-6.
    - Act of 1903, Provisions of—It was felt that it was better to face the danger of clashing than to interrupt work of Board, Estates Commissioners were placed under general control of Government, who could direct their operations more on one area than another, and so avert the danger (G. Wyndham), V., 22843-50, 22890, 22895-900.
    - Area under power of Board was not sufficiently defined (A. Larminie), IX., 50009-10.

    - No clashing in agricultural instruction, but there was in purchase and development of land (Canon Macken), X., 56162-3.
    - Overlapping could be prevented by Administrative arrangements (W. H. Boyd), 23846, 23865-6.
    - Price of Land, *see* that subheading.
    - Single Authority, Argument in favour of (G. Wyndham), V., 22842.
  - Conference held and agreement come to that Land Commission would either buy land for Congested Districts Board, or attach special valuer to Mr. Doran, who would inform him of views of Land Commission, &c. (F. S. Wrench), III., 15202-4.
    - Agreement had been a dead letter (F. S. Wrench), III., 15205-10.
  - Congested Districts Board and Estates Commissioners should each buy for themselves—Very difficult for one body to buy for another (F. S. Wrench, III., 15163, 15176.
    - Better for same valuer to buy who had afterwards to re-arrange holdings (F. S. Wrench), III., 15193-5.
  - Congested Districts Board were given the powers before the Estates Commissioners were created, but there was nothing in the law to prevent the Estates Commissioners acting as they did (F. W. D. Mitchell), I., 1203-5.
  - Different rules applicable to the two agencies—If circumstances varied, mode of treatment naturally differed (F. W. D. Mitchell), I., 1208-9.
    - Similar Estates might possibly meet with different modes of treatment (F. W. D. Mitchell), I., 1210.
  - Estates Commissioners free to purchase estates within congested districts—Choice of purchaser rested with the landlord under Act of 1903 (F. W. D. Mitchell), I., 1197-9.
  - Evils of (T. W. Russell), IX., 51875-6.
  - Hampering of work of Congested Districts Board which would result from purchase by Estates Commissioners of large part of land available (F. S. Wrench), III., 15023-4.
  - Loss—Estates Commissioners limited to 10 per cent. in dealing with Congested Estates, Board not limited to any particular amount of loss on that head (F. W. D. Mitchell), I., 1200-2.
  - No objection, Board would be substantially occupied with congested estates, but hard and fast rules were unnecessary and undesirable (The O'Conor Don), VII., 41387-9.

AUTHORITY TO DEAL WITH CONGESTION—*continued.*

- Two or more Agencies in same area doing same class of work—*continued.*
  - Opinion against (J. P. Hayden), X., 58266, 58275-6, 58284.
  - One Agency had the legal right to do the work in both areas while the operations of the other must be for the benefit of the congested parts of the country (F. W. D. Mitchell), I., 1206.
  - Price, Question as to (Canon Macken), X., 56196-8, 56209; (Rev. J. A. Pelly), X., 57179; (J. P. Hayden), X., 58291.
    - Conflict as to price could be avoided (F. S. Wrench), III., 15188.
    - Nothing to prevent an understanding between Board and Commissioners (F. S. Wrench), III., 15192.
    - Two bodies purchasing at different prices did complicate matters (F. S. Wrench), III., 15182.
